

WORLD ANAESTHESIA DAY 2024 & CPR WORKSHOP

We department of Anaesthesia, Government Dindigul Medical College conducted “WORLD ANESTHESIA DAY 2024 & CPR WORKSHOP” on 16th October 2024.

CPR- Cardio Pulmonary Resuscitation, is an emergency lifesaving procedure every individual must know. So it is essential for budding doctors to know the basics of Cardio Pulmonary Resuscitation.

CPR can significantly increase the chances of survival for someone in cardiac arrest, providing vital time until professional medical help arrives.

The CME was inaugurated by the Dean, Dr.Suganthi Rajakumari, Deputy Medical Superintendent Dr.Suresh Babu, Vice Principal Dr.Geetha Rani.

A detailed theory about Cardio Pulmonary Resuscitation was taken.

There are different types of CPR depending on the age of the person (adult, child, and infant) and whether rescue breaths are included or not. So we had setup 4 stations namely BLS for adult and children, ACLS, Airway training and Difficult airway demo.

BLS TRAINING

ACLS TRAINING

AIRWAY TRAINING

DIFFICULT AIRWAY DEMO

We encouraged our students to perform individually in the all four stations.
