

A new perspective to an old problem

As India has become the diabetic capital of the world, the number of cases are being increased exponentially. As the number of cases increase, so does the patients with

complications. We need to equip ourselves with enough knowledge and skills to manage diabetic foot without an amputation.

This CME on Diabetic Foot was conducted on 11/07/2024 by the department of General Surgery, Government Medical College Hospital, Dindigul. Welcome address was given by Dr Amalan Sankar, Head of the Department, Department of General Surgery. The CME was inaugurated by the Dean, Dr Suganthi Rajakumari, Medical Superintendent Dr Veeramani, Deputy Medical Superintendent Dr Suresh Babu, Vice Principal Dr Geetha Rani. Talks were given by various speakers, Dr Nirupan Chakkaravarthy, Dr Vinodhini, Dr Maharajan, Dr Marunraj on different aspects of diabetic foot management. They were

academic delights. Vote of thanks was delivered by Dr Thiruloga Chandran, Associate professor, department of General Surgery..

This novel programme was attended by undergraduate students, faculties from other departments, interns.

The need for early recognition and management of complications was emphasised. Amputations must be avoided as

much as possible to ensure patient's mental well being.
